EDUCATION

University of California, Irvine

B.S. in Computer Science

Graduated June 2025

Irvine, CA

Coursework: Data Structures, Algorithms, Artificial Intelligence, Information Retrieval, Machine Learning, Database Management, Computer Networks

Awards: Director's Scholarship, Varsity Athlete Scholarship, Dean's Honor List

EXPERIENCE

Alpha Ring

Modder & Developer | C++, C

Aug 2026 – Present

Open Source | 📺 Demo | 🌐 GitHub

- Contributing to an open-source **Halo: MCC** mod in **C++**, enabling local split-screen co-op on PC.
- Shipping features and bug fixes as part of a two-person team, maintaining a project used by **thousands of active users**.

Handshake

AI QA

Oct 2025 – Dec 2025

Remote

- Evaluated and scored AI-generated **image outputs** against defined quality and safety criteria in collaboration with leading researchers.
- Identified inconsistencies and edge cases across outputs, providing structured feedback to improve model accuracy and reliability.

CALIT2

Software Engineer Intern

Mar 2024 – Jun 2024

Irvine, CA

- Engineered a full-stack **React** platform helping users locate nearby cooling centers and access personalized heat-safety recommendations, reducing heat-related health risks.
- Increased successful location matches by **~50%** through radius-based search and client-side filtering.
- Conducted **A/B testing** to measure user engagement and guide frontend feature development.

PROJECTS

SQL Duel

Present

- Building a real-time **1v1 SQL competition platform** with private lobbies, live matches, and automated query evaluation.
- Developing an automated judging system using **FastAPI** and **sql.js** to execute queries and validate solutions against hidden test suites for instant feedback.
- Designing **WebSocket**-based matchmaking and **Redis** state synchronization to support concurrent multiplayer sessions.

Rank Tracker | Python (Flask), React, Riot Games API, SQLite

March 2025 | 🌐 GitHub

- Led a team of **4** to build a full-stack web app in **under 48 hours** at Irvine Hacks.
- Integrated a customizable, real-time leaderboard with the **Riot Games API** for instant performance insights.
- Incorporated user feedback to guide product changes and improve the user experience.

Fabflix | Java, JavaScript, MySQL, Redis, AWS, Docker, Kubernetes

Sep 2024 – Dec 2024 | 🌐 GitHub

- Built a full-stack movie catalog web app for browsing and searching movie records, deployed on **AWS EC2**.
- Implemented a Java **SAX-parser ETL pipeline** to ingest **12,000 movies** and **25,000 actor-movie** relations into **MySQL**.
- Added **Redis**-based full-text search, session-based cart functionality, and dynamic catalog rendering.
- Improved response latency by **50%** through **jMeter** load testing and connection pooling.
- Secured the application with SHA-256-hashed passwords, session management, reCAPTCHA, and PreparedStatements.
- Containerized the application with **Docker** and deployed it across **Kubernetes** on AWS for high availability.

SKILLS

Languages: Python, C++, JavaScript, Java, C, SQL

Technologies: React, Node.js, Flask, AWS, Docker, Kubernetes, MySQL, Git, Pandas, Linux

Spoken: English (Fluent), Chinese (Working Proficiency)
